Kisco Information Systems   *News Release*

FOR IMMEDIATE RELEASE

Kisco Adds Digital Signatures to WebReport/400

Saranac Lake, NY, March 25, 2011: **Kisco Information Systems** (www.kisco.com) today announced the immediate availability of version 11 of their WebReport/400 package.

With this release, WebReport/400 can apply digital signatures to spool files converted into Adobe Acrobat PDF format. Digital signatures guarantee the authenticity of a report being issued from your IBM i system and confirm that the report contents have not been altered since they were issued. Digital signatures can be based on self-issued signing certificates issued by your IBM i using the Digital Certificate Manager (DCM) that is built into the i/OS, or a commercially available certificate from a known issuing agency.

The new release of WebReport/400 also includes a new capability to split up reports into email output, fax output and local printing based on embedded directives added to the spool file. This feature helps deliver a single report to multiple recipients in the exact form needed for each user.

The new release also includes these new features:

- Automatic FTP transmission of spool files converted and stored in the IFS
- Existing message queue monitor functions improved with message ID exception processing to ignore selected message IDs where you don't want to have notification sent.
- File monitor feature now supports summary notifications in addition to previously available detail notifications
- Automatic report routing based on the user profile associated with the spool file is now supported

WebReport/400 is an e-business utility that will convert IBM i reports to PDF, Excel or formatted text and distribute them in email or as internet/intranet content. The application offers flexible configuration and ease of use, as well as the ability to embed report distribution functionality into your existing applications. Reports can be processed manually, set up to be handled automatically using monitored output queues, or embedded directly into applications using our standard IBM OS command formats.

For complete, detailed information in WebReport/400 and all its features, along with case studies, screen shots and technical support announcements, please visit www.kisco.com/webreport.

WebReport/400 PDF, is priced at $1,995.00 for a single partition installation on the IBM i family of systems. For companies with several systems, Kisco offers multiple-license discounts.   Kisco Information Systems also offers a free 30-day evaluation of the product that can be downloaded with complete software documentation in PDF format from www.kisco.com. To obtain a free evaluation on CD or by download call Kisco at (518) 897-5002 or e-mail sales@kisco.com.
