Release

FOR IMMEDIATE RELEASE

Kisco Announces Release 14
Of WebReport/i

Saranac Lake, NY, October 6, 2020: **Kisco Information Systems** (www.kisco.com) today announces the immediate availability of Release 14 of their WebReport/i software. WebReport/i converts reports from spool files on the IBM i platform to a variety of popular formats and then puts them in the hands of end-users using a wide array of optional delivery methods.

Release 14 includes several improvements to the Report Intranet feature that lets users access reports using their browser. Reports are secured to only those users authorized for specific reports. The display functions have been enhanced to allow each user to change the report presentation sequence. Files from non-spool file sources can now also be added to the Intranet.

The FTP option has been enhanced to allow for specific selection of the port number to be used during an FTP transfer of converted spool files. Variable email options have also been enhanced along with a new quick email test option to easily diagnose email problems. When sending a report to a user using email, the email body text can now be optionally rendered using HTML. New PDF scaling options have also been implemented.

WebReport/i PDF, is priced at $2,305.00 for a single partition installation on the IBM i family of systems. A discounted purchase price of $2,195.00 is available until the end of 2020. IBM i OS levels from 7.1 through 7.4 are supported. For companies with several systems, Kisco offers multiple-license discounts.   A free 30-day evaluation of the product that can be downloaded with complete software documentation from www.kisco.com. To obtain a free evaluation on CD or by download call Kisco at (518) 897-5002 or e-mail sales@kisco.com.
